DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, Claims 1-10, drawn to Semiconductor Device, classified in class 257, subclass 192+.

Group II, Claims 11-17, drawn to Method for Fabricating a Semiconductor Device, classified in class 438, subclass 197+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of Group I can be manufactured by selectively depositing a pad oxide layer pattern instead of forming a first pad oxide layer and a first mask layer and forming an opening in the first mask layer and removing the first pad oxide layer exposed by the opening to form cavity.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
